Robotics Project #3 · Kids.JoinDev

Scribble Art Bot

Ages 7+ · 40 min · Build with a grown-up!

🎯 Goal

Build a robot that draws wild patterns by itself.

🧰 You need

paper or plastic cup

3 markers (legs)

small hobby motor

AA battery pack (2xAA)

cork or clay blob (off-centre weight)

tape

🔧 Build it

1. Tape 3 markers around the cup as legs, tips down. ☐
2. Take the marker caps off. ☐
3. Push a cork onto the motor shaft, off-centre. ☐
4. Tape the motor on top of the upside-down cup. ☐
5. Connect the battery pack wires to the motor. ☐
6. Set it on big paper and watch it draw! ☐

⚠️ Safety

Use a big sheet of paper and washable markers. A grown-up checks the wires don't get hot.

💡 How it works

The wobbly weight shakes the cup, the legs skid and the pens draw the path. Move the weight to change the pattern!
