Robotics Project #5 · Kids.JoinDev

Robot Hand with Straws

Ages 6+ · 40 min · Build with a grown-up!

🎯 Goal

Make a hand whose fingers bend when you pull strings, like tendons.

🧰 You need

card cut in a hand shape

5 drinking straws

string or wool

tape

kid scissors

🔧 Build it

- [ ] 1 Trace your hand on card and cut it out.
- [ ] 2 Cut straws into short pieces.
- [ ] 3 Tape 3 pieces along each finger, with gaps at the knuckles.
- [ ] 4 Fold the card gently at each gap.
- [ ] 5 Thread a string through each finger and tape it at the tip.
- [ ] 6 Pull the strings: the fingers curl!

⚠️ Safety

Kid scissors only. Ask a grown-up to help cut the straws.

💡 How it works

Your fingers have tendons pulled by muscles. Robot hands use strings or cables pulled by motors to do the same.
