Robotics Project #6 · Kids.JoinDev

Light-Up Robot Face

Ages 7+ · 30 min · Build with a grown-up!

🎯 Goal

Make a robot face with glowing LED eyes using a paper circuit.

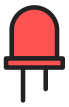

🧰 You need

card with a robot face drawing

copper tape or kitchen foil

2 LEDs

CR2032 coin battery

binder clip

🔧 Build it

1. Draw a robot face on card. ☐
2. Lay two copper tape paths: one for + and one for -. ☐
3. Poke LED legs through the eyes. Long leg goes to +. ☐
4. Tape the legs flat onto the paths. ☐
5. Put the battery at the corner, + side up, fold the card over it. ☐
6. Clip it closed: the eyes glow! ☐

⚠️ Safety

A grown-up handles the coin battery and stores it safely. Never swallow it.

💡 How it works

Electricity flows in a loop (a circuit) from + to the LED and back to -. Break the loop and the light goes out.
