Robotics Project #8 · Kids.JoinDev

micro:bit Robot Pet

Ages 8+ · 45 min · Build with a grown-up!

🎯 Goal

Code a robot pet face that smiles when you press a button and gets dizzy when shaken.

🧰 You need

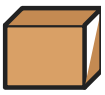

BBC micro:bit

USB cable

AAA battery pack

small box for the pet's body

markers

🔧 Build it

1. Open python.microbit.org with a grown-up. ☐
2. Type (or copy) the robot-pet code. ☐
3. Send it to the micro:bit with the USB cable. ☐
4. Put the micro:bit in the box as the pet's face. ☐
5. Press A: happy! Press B: sad! Shake it: dizzy! ☐
6. Change the faces and make your own pet moods. ☐

⚠️ Safety

Use the battery pack, not a wall plug.
Grown-up helps with the computer.

💡 How it works

The micro:bit is a tiny computer. Buttons and the motion sensor are inputs; the LED screen is an output. Your code joins them up.

Code: pet.py (in the project folder)
